

# ACCERO™

## High Surfactant Oil Concentrate

ACCERO™ is an NPE/APE-free high surfactant crop oil concentrate formulation that is used at 50% of the traditional use rate of ordinary crop oil concentrates. Accero is an ideal tank mix partner for enhancing the performance of a wide range of herbicide tank mixes, particularly under tough or stressful growing conditions.

### BETTER EMULSION STABILITY

### HOW IT WORKS

The emulsifiers in ordinary COCs create a macroemulsion, which will eventually separate. The emulsifier package in Accero creates a microemulsion, which will remain stable from dilution to spray time.

### WHAT MAKES ACCERO BETTER:

- ✓ Great fit for tank mixes where MSOs are not allowed
- ✓ High-quality emulsifier/surfactant system
- ✓ Promotes improved weed control
- ✓ Robust tank mix compatibility
- ✓ Low use rate for easy handling and inventory management
- ✓ NPE/APE-free for additional crop safety and performance
- ✓ CPDA certified for quality assurance

## High Surfactant Oil Concentrate

### PRINCIPAL FUNCTIONING AGENTS

Phytobland Paraffinic Oil.....	60.0%
Sorbitan monolaurate poly(oxyethylene)ether and dodecylbenzenesulfonate isopropylamine salt.....	34.5%
Constituents Ineffective as Spray Adjuvant.....	5.5%
Total.....	100%

Surfactant content: 34.5%

Oil content: 60%

All ingredients are approved for use under 40 CFR 180

### KEEP OUT OF REACH OF CHILDREN

#### PRECAUTIONARY STATEMENTS

Causes skin irritation and serious eye irritation. Harmful if swallowed or inhaled. If medical advice is needed, have product container or label at hand. Read label before use. Wash protective equipment and work clothes thoroughly after handling. Specific treatment is given in the First Aid section on this label or on the SDS.

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators or other handlers of this product should wear; long-sleeved shirt, long pants, socks, shoes, protective eyewear and chemically impervious gloves.

#### FIRST AID

- If Swallowed:** Call a poison control center or doctor immediately for treatment advice. Have the person rinse mouth and sip a glass of water if able to swallow. Do not give anything to an unconscious person.
- If In Eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.
- If On Skin:** Wash affected area with plenty of soap and water. Use tepid water if available. Treat symptomatically. If skin irritation occurs: Get medical advice or attention. Take off contaminated clothing and wash it before reuse.
- If Inhaled:** Move person to fresh air. If person is having difficulty breathing, give oxygen. If not breathing, give artificial respiration.

Note to Physician: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

#### GENERAL INFORMATION

ACCERO is an APE/NPE free high surfactant paraffinic oil formulation that serves as an effective replacement for ordinary crop oil concentrates. ACCERO can be used at half the normal use rate of ordinary crop oil concentrates.

FOR USE WITH PESTICIDES REGISTERED FOR AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY AND OTHER APPROPRIATE USES. NOT FOR AQUATIC USE.

#### DIRECTIONS FOR USE

The addition of adjuvants to some pesticides and/or fertilizers and their tank mixes may cause phytotoxicity to the foliage and/or fruit of desirable crops. Before using Accero, the applicator or crops advisor must have experience with the pesticide combination, including Accero, or must have conducted a phytotoxicity test. Do not use this product in a manner inconsistent with labeling. Accero increases the activity of many pesticides; therefore, care must be taken when treating sensitive crops during periods of drought stress, high temperatures or high humidity.

#### USE RATES

Apply at one-half the recommended rate of crop oil concentrate.

#### Ground:

Use 0.5% v/v (4 pints of Accero per 100 gallons of spray solution) or a minimum of 10-12 fl oz/A unless otherwise directed on the pesticide manufacturer's label.

#### MIXING

In the absence of specific mixing instructions found on the herbicide, insecticide, fungicide or plant growth regulator label, fill the spray tank with at least 50% of the desired finished carrier volume. When premixing in a mixing vessel or inductor, fill with at least 20% of the desired finished carrier volume. While the carrier is agitating, add tank mix ingredients in the following order:

1. Compatibility agent and/or antifoam, if needed
2. AMS, dry formulations (WP, DF, WDG, SP), and dry drift retardants
3. Dry soluble and suspension fertilizers / micronutrients
4. Liquid drift retardants and flowable formulations (F & FL)
5. Liquid concentrates, suspension concentrates, microencapsulated and capsule suspension (LC, SC, ME, CS)
6. Emulsifiable concentrates (E, EL or EC)
7. Solutions and soluble liquids (S or SL)
8. Liquid micronutrients and fertilizers
9. Water conditioners and other adjuvants (COC, HSOC, MSO, NIS)
10. Finish filling to desired spray volume level and continue agitation

#### STORAGE AND DISPOSAL

Protect product from freezing. If product freezes, warm to room temperature and shake or recirculate before use. Keep containers sealed when not in use. Store in original container only. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org). Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

#### PACKAGING:

- 2 x 2.5 gallons per case
- 275 gallon minibulk
